

Sylvain Corsini

> AI Cloud Engineer

sylvain.corsini@protonmail.com

+33625243461

Bordeaux, France

github · linkedin

Over 15 years of writing code, from web development to backend, data and cloud, and now LLM infrastructure and MLOps. What I enjoy most: making complex systems reliable, scalable and easy for other engineers to build on.

Moving to Tokyo in January 2027, available from then on.

01 Experience

Aug 2025 - present 1 yr 3 mos

Cloud Engineer — GenAI Team

Betclic Group · Bordeaux, France

Infrastructure behind the Generative AI team's internal LLM products: run the centralised LLM gateway (LiteLLM) in front of Azure AI Foundry, AWS Bedrock and OpenAI, several million tokens per hour, per-team quotas and cost tracking.

Sept 2023 - Aug 2025 2 yrs

Cloud Engineer — Online Team

Asobo Studio · Bordeaux, France

Cloud infrastructure behind Microsoft Flight Simulator 2024's online services: an internal platform (Helm, CDKTF, CI/CD) for shipping to Kubernetes, autoscaling for spiky game traffic, ML and GPU infrastructure, on-call from launch through the live service.

Mar 2023 - Sept 2023 7 mos

Backend Developer

ENACO, Whatwapp · Roubaix, Milan · freelance

ENACO's e-learning platform (architecture, Node.js APIs on GCP, move to GKE); a real-time leaderboard and matchmaking for Whatwapp's mobile games.

Apr 2022 - May 2023 1 yr 2 mos

Lead Backend Developer

Virtual Regatta · Villeneuve-d'Ascq, France

Led the backend team and the whole AWS infrastructure of a real-time racing game (up to a million concurrent players): migration off GameSparks to a serverless stack as infrastructure as code (CDK, Lambda, Step Functions, DynamoDB), on-call, engine rewritten from Node.js to Go (from 5 minutes down to 10 seconds).

Apr 2018 - Apr 2022 4 yrs 1 mo

Technical Lead

Adfinitas · La Madeleine, France

internship 2018 → apprenticeship 2018-20 → technical lead 2020-22

Led the technical team and the whole infrastructure, serverless on GCP: Calicut, an event-driven webhook platform (thousands of requests per second), GDPR-compliant data lakes, client migrations to GCP.

Nov 2015 - Apr 2018 2 yrs 6 mos

Internships and freelance work during my studies

Data Engineer (La Redoute) · Computer Science Instructor (Epitech) · Software Engineer (Nuukik) · Full-stack Web Developer (freelance)

02 Education

2015 - 2020 5 yrs

Software Architect (Master's level)

Epitech · Lille, France

Project-based learning: C and C++ in depth, autonomy, teamwork.

03 Skills

GENAI

LiteLLM Azure AI Foundry
AWS Bedrock OpenAI
LangGraph Claude Code

CLOUD & INFRASTRUCTURE

Azure AWS GCP Kubernetes
Helm Terraform Docker Linux
Bash PowerShell

LANGUAGES

Go Rust TypeScript Python

04 Languages

French	Native
English	Professional
Japanese	Learning (N5, self-assessed)

05 Interests

Photography @scorsisan

Music

Board games

Novels and manga
